

ELECTROMAGNETIC + FREEZING

# 1 MACHINE WITH <sup>®</sup> DOUBLE EFFECT

The new combination for muscle increase and fat reduction

Build muscle and reduce fat in 30 minutes, faster and more effective

## COMBINING TWO TECHNOLOGIES

The combination of cryo-lipolysis and high-focus electromagnetic technology can freeze fat cells at low temperature and reduce the thickness of the fat layer. At the same time, the high-energy electromagnetic energy acts on the core muscle group for a second time, stimulates the growth of muscle fibers, consumes excess fat, and achieves sustainable muscular body shaping.

ELECTROMAGNETIC  
+  
FREEZING

# COOLING 360° FAT FREEZING

Taking advantage of the fact that subcutaneous fat cells will automatically coagulate when the temperature is lower than 0 degrees, the temperature of 0 ° C to -11 ° C is delivered to subcutaneous fat, so that fat cells undergo a series of cellular reactions to increase the production of intracellular free radicals and induce fat cells to dissolve Metabolized, naturally excreted from the body.

- 360° Surround Cooling Handpiece
- Innovative "Preheat" Patent
- Exclusive massage mode
- Safety temperature sensor monitoring technology
- Intelligent positioning scans the fat layer
- One-button automatic cleaning handpiece is convenient and hygienic

# MOVING HIGHLY FOCUSED ELECTROMAGNETIC BUILD MUSCLE

High-energy focused electromagnetic waves stimulate muscles to perform high-intensity and high-frequency contractions, start myofibril repair to achieve the effect of muscle growth, increase body muscle tissue and increase basal metabolism; high-energy focused electromagnetic fields are used for high-frequency and high-intensity muscle training. Fast consumption of fat, so that the fat volume is reduced, dissolved and metabolized out of the body.

- Flat applicator

- Curve applicator

- It's for arms, abdomen, pelvic floor and buttock.

- A variety of operation modes, which can gradually strengthen the muscles to achieve the perfect exercise effect
- More intensive muscle contractions with a 20% increase in energy
- High magnetic energy, more effective on core muscles
- Stimulate deep core muscles in 30 minutes for stronger contractions

# Why choose us ?

**The first in the industry:** dual-energy working system (refrigeration technology + high-focus electromagnetic technology)

**Powerful energy:** dual power supply configuration, independent energy output is stable, no attenuation.

Various sizes of handpieces: **2 kinds of hand tools, 5 kinds of sizes are suitable for many parts of the body.**

**2 cooling handpieces, each with three different sized handpiece heads;**

**2 electromagnetic handpieces, flat or curved optional;** Multiple parts can be improved at one time, and one or more (freezing + electromagnetic) can be used in combination

**Intelligent operation platform,** two independent operating systems, four handpieces work at the same time, easy to learn

**Advanced monitoring system,** real-time monitoring of temperature and data changes

The freezer handpiece is equipped with one-button intelligent cleaning function, which is safe and hygienic

## Therapeutic advantage

**Patented technology**, high strength, high focus.

**Double effect**, fat-dissolving & muscle-building in one step.

**Non-invasive**, safe and comfortable without recovery period.

Multiple parts work at one time, saving time and convenience.

After treatment, the effect of muscle increase continued to **19%**.

## APPLICABLE PARTS

A woman in a white tank top and shorts, looking down at her waist.
